

2006 SURVEY CATEGORY LIST & CODES

The following will help guide you through the list and determine which categories your products may fall into.

1) Browse the list – Browse the entire list, to get an idea of where your products may fall. *Note the list organization, including the major market sectors and major product headings.*

2) Locate the product category that best describes your product – Once you have narrowed your choices down to a major market sector, look for the specific product category in the list that best describes your product according to its principal display panel. Your product may fall into multiple categories. The category code listed next to each product category will be used on FORM 3 (item #3). If your product fits into more than one category, you may list multiple category codes on FORM 3.

**Note: If you do not locate a category name that suitably describes your product, then you do not need to report it.*
